

## Increase Performance with Agility and Automation

A growth focus requires technology and processes designed to scale with dynamic front-line business drivers that provide insights and enable the core finance and operations functions to continuously innovate. We help our clients align a modern ERP platform strategy with scalable processes that empower employees, customers, suppliers and communities creating advantages for growth journeys.

## Strategy & Services

Evaluation of current state ERP and available ERP platform options based on business agility, growth, opportunities for process improvement, and strategy factors. We help you understand and align your business outcome to the right ERP platform. Our services are delivered through a Fractional Operating Partner model with continuing transformation management support.

## Industry Focus

Our experience covers many industries, representative industries include: Technology, Construction, Professional Services, Financial and Industrial sectors.

## Revenue Size

Target company sizes range from \$3M - \$50M annual revenue.

## Technology Partners

To increase your overall revenue and market position we work closely with our network of select advisory firms combined with the strategic advantages of our technology partner channel relationships.
